I agree. He has brought this up on several occasions. Further, I believe GP has asked him specifically regarding what are the other non-dioxin like effects. I think he said it should be brought into the uncertainty discussion.

For the Area 2 RI, I do not want to revisit those discussions in the uncertainty section. I think those that Frank highlighted are adequate.

Jim

Jim, Jeff, and Patty,

MDEQ, aka Tony keeps commenting that the TBERA does not address the non-dioxin like effects of the PCBs. PCB toxicity is not my area of expertise, but I've gone into the literature to better understand if there is merit to MDEQ's comments on this issue. Based on that review I believe that the TBERA and the PRGs are protective of all effects of PCBs.

Tony and I have never discussed this directly. I will call him and talk through the issue so we can have a common understanding or at least understand why we disagree on this issue.

Frank

Jim, attached are CH2M HILL's comments on the Area 2 SRI. Please add EPA's comments and send back to me and I will number comments and have editing take one last look at the formatting. Yellow highlights are areas where I have to go back and reference previous comments.

Paul, Todd

I simply copied everyone Todd had on his distribution list. Please verify your entire team received the comments.

Thanks JK

Jeff/Patty/Frank-

Current rough draft of our comments to facilitate discussion on issues related to Area 2 SRI. Ignore text highlighted in yellow (or weigh in at your choice), these are things we're still working on.

Anything statistical, please feel free to contact John Kern directly.

Thanks,

TK
